## YUBA EAST MINE DEAL IS CLOSED

Pioche Property in Litigation for Years Is Landed by Boston Company.

BELONGED TO A. W. McCUNE

PURCHASER BUYS OUT BOTH SIDES TO CONTROVERSY.

The famous Yuba East property at Pioche, the property that has so long been the foundation of contention between A. W. McCune and William Lloyd, has finally passed into possession of the Boston & Pioche company, at the head of which is Charles S. Miller of Boston. Its acquisition was the result of the purchasing company dealing with both the McCune and Lloyd interests and the papers passed at Pioche on Saturday. Negotiations for the property have been carried on by Mr. Miller and A. W. Scott, the promoter of the Boston & Pioche company, for a long time past, and yesterday's mail brought the information from Mr. Miller at camp that the mine and the list papers had been signed and delivered.

The Boston & Pioche company owns a large block of ground adjoining the famous old Yuba mines on the east and now that the Yuba East claim has been finally secured, its possession has been rounded out just as it was intended they should be in the beginning.

A few years ago the Lloyd secured permission to operate in Yuba East ground from the workings of the Yuba and, that his efforts were not misdirected it may be said that he shipped two cars of ore that were worth \$5,000, an amount that the McCune interests sought to recover. As the Yuba mines are now a portion of the possessions of the Nevada-Utah company, the Boston & Pioche company, of course, is compelled to open the ore bodies from the surface. Anticipating an early closing of the deal Mr. Miller ordered the sinking of a shaft several days ago. In his letter to Mr. Scott he stated that the shaft was already down thirty feet, while it is expected that the ore body from which the Lloyd interests shipped will be tapped at a depth of 100 feet. The expectation is that about the richest mine in that lively camp is going to be opened through the new shaft on the Yuba East claim and the entire district is celebrating the close of litigation that has held back the development of the ground so long.

## KNIGHT CROWD'S BUY IN AMERICAN FORK

American Fork, Sept. 30.—The securing of mining claims in American Fork district by the Jesse Knight interests has awakened new interest in the camp. Everybody who has had any sort of a claim there for a great many years past are looking up and wondering where they are at, and outfits are going up the canyon every day endeavoring to find a claim that has not been appropriated. Parties from all over the country are going up to prospect the district and locate any claims that look good to them.

Twelve claims were secured by the Knight interests on what is known as Mineral flat, at the head of the canyon, about one mile north of the Miller hill, and extending a little over into the Alta district. Development on these claims will begin next week. Some of the prospects have had considerable work done on them and in one shaft a nice body of carbonate ore has been opened up which assays over \$100 in lead and silver. Articles of incorporation have not been filed yet, but the company has been organized for 1,000,000 shares, all of which have been taken excepting 200,000 reserved as treasury stock. J. C. Jensen and John Creer of the Knight interests went up the canyon from here yesterday. It is understood they are making this trip for the purpose of inspecting the two or three more groups of claims in the district.

W. H. Young, president of the Sismet Mining company, with the board of directors, made a trip to the canyon last week to investigate the report of the recent strike. They found the mine looking very encouraging, and the ore was about fourteen inches thick at assay about \$50 per ton. They expect this vein to develop sufficiently large to put the property on a shipping basis within the next few months.

Corydon W. Higgins of the Salt Lake Mining Review went up the canyon the past week in American Fork canyon mining district in search of authentic information regarding the early history, and also the present condition of the district for his paper. He had his camera along and secured a number of valuable views of the canyon, which will no doubt appear in the Review.

## COMMONWEALTH IS GETTING BIG ORE BODY

The prospecting shaft that is being sunk on the Commonwealth company's Beacon property in Beaver county, is showing up more and better ore with every foot of depth attained. In the bottom of the shaft on Saturday, Manager Newton Dunston stated yesterday, there was eighteen inches of solid copper ore on the foot wall that assayed 15.7 per cent on the ore silver and 25.7 per cent on the gold. The silver values have more than doubled during the past ten days and the ore, which was previously pretty well scattered through the ledge matter, is now beginning to concentrate and show a solid body, as indicated in the appearance of the eighteen-inch streak on Saturday.

"In doing this work," said Manager Dunston, "the aim has been to follow the ore down and keep the foot-wall all the time. We shall soon be down to the 100-foot mark, but whether we shall run out and prospect the ledge at that depth has not yet been determined. I am certain that we are going to develop some fine ore bodies in that particular claim of the company's and when the showing was

## MINING STOCK EXCHANGE.

More Than \$1,500,000 Worth of Trading in September.

In the face of adverse eastern market conditions the local mining stock exchange did a big business in September. A total of 1,567,231 shares of stock, with a selling value of \$1,501,062.33, changed hands. Yesterday's proportion of the total was 69,435 shares of stock and \$4,450.31. The bear element again jumped on the Crown Point and the price was crowded down from 75 cents to 69 cents before the slaughter stopped. It closed at 70 cents. Other stocks presented a very steady appearance, and while trading was not particularly active in any but a few of the stocks dealt in, the market was, on the whole, in pretty good shape.

Following is the list of final quotations and record of sales made during the two regular and open board calls:
